1969 CENSUS OF AGRICULTURE

Many of the county estimates in this bulletin give consideration to the 1969 Census of Agriculture data for geographic distribution down to the county level. The Ohio crop and livestock estimates of the Statistical Reporting Service and Ohio crop and livestock income estimates of the Economic Research Service used in preparing this publication were not revised to reflect the 1969 Census data.

1971 CASH RECEIPTS FROM FARMING IN OHIO

Ohio farm income reached a new record high in 1971. Cash receipts from marketings and government payments totaled \$1,486,596,000, up 3 percent from a year earlier. A decrease of \$18 million in government payments to Ohio farmers was more than offset by an increase of about \$63 million in cash receipts from farm marketings. Payments under the Feed Grain Program were down about \$18 million in Ohio, accounting for the drop in government payments. By program, Ohio government payments for 1971 were: Feed Grain Program, \$35,811,000; Wheat Program, \$25,164,000; Conservation, \$3,754,000; Cropland Adjustment, \$2,817,000; Sugar Act, \$1,571,000; Wool Act, \$2,068,000; miscellaneous programs, \$6,000.

Ohio farm marketings during 1971 amounted to \$1,415,405,000. Of the total, livestock and livestock products accounted for 54.2 percent and crops accounted for 45.8 percent. Livestock cash receipts were down only slightly from a year earlier, while income from crops rose 12 percent from 1970.

Ohio's two major field crops, soybeans and corn, were up 8 percent and 19 percent respectively from 1970 cash receipts. Other significant increases included potatoes, up 46 percent; wheat, up 20 percent; fruits and nuts, up 16 percent; oats, up 15 percent; and vegetables up 13 percent. Hay, hayseed crops, forest products and tobacco were all down from a year earlier.

The two major livestock groups, dairy products and cattle and calves, were up 4 percent and 11 percent, respectively. Cash receipts from hogs were down 15 percent from 1970 while receipts from sheep, lambs and wool were down 9 percent and poultry and eggs were off 11 percent.

Dairy remains the largest single source of cash receipts to Ohio farmers, accounting for 19 percent of the State total income from farm marketings. Cattle and calves ranked second with 17 percent and soybeans were a close third place with 15 percent of the total. Corn and hogs were next in rank with 13 and 12 percent of total cash receipts, respectively. These five commodities accounted for 75 percent or three-fourths of the total cash receipts to Ohio farmers in 1971.

Darke County remained the top county in 1971 with cash receipts of over \$45 million. The next five highest counties - Mercer, Wayne, Fulton, Wood

and Putnam - each exceeded \$30 million in cash receipts and were unchanged in ranking from a year earlier. Leading counties by commodities were: Wayne, dairy products; Fulton, cattle and calves; Clinton, hogs; Mercer, poultry; Wood, soybeans and wheat; Darke, corn; Lorain, vegetables; and Lake, greenhouse and nurseries.

PROCEDURE

Estimates of cash receipts by county from farm marketings in Ohio were published initially in 1927 and annually since 1929. These county estimates of cash receipts are published by the Department of Agricultural Economics and Rural Sociology of the Ohio State University and the Ohio Agricultural Research and Development Center in cooperation with the Statistical Reporting Service of the U. S. Department of Agriculture. This bulletin contains the 1971 Ohio county cash receipts estimates, and revised 1970 estimates for the State.

Gross and Net Farm Income data are presented in Table III. The information is available only at the State level, but the relative income and expense situation of the Ohio farmer can be observed over a period of years.

Cash Receipts represent gross returns from the actual sale of crops and livestock during the calendar year. The value of home consumption and some inter-farm sales are not included as cash receipts. Production expenses such as feed, fuel, fertilizer, and purchases of feeder animals are not subtracted from cash receipts. The addition of government payments to cash receipts provides a measure of gross cash income, or total cash receipts from farming.

Current cash receipts estimates for Ohio and other States appear in the USDA's Farm Income Situation--220--Supplement, July 1972. These estimates are prepared by the Economic Research Service of the U. S. Department of Agriculture from basic data provided by the Statistical Reporting Service, the Census of Agriculture, and other sources. The State estimates published in this bulletin may differ from previously published estimates due to revisions in marketings, inshipments, inventory numbers, etc., as more complete information becomes available.

Data from milk market administrators provided a basis for allocating receipts of milk from producers at plants operating under the Federal Order to counties. Data from the Division of Animal Industry, Ohio Department of Agriculture provided information on the location by county of producers selling milk to dairy plants. The number of producers in each county was used as a basis of breaking down total receipts at plants not under Federal Order to counties. This assumes annual deliveries per producer to each plant would not differ significantly at the county level. Each grade of milk was considered separately in arriving at the county total cash receipts.

As in recent bulletins, the sale of dairy cows and veal calves has been included with the sale of cattle and calves. Poultry cash receipts include income from the sale of eggs, farm chickens, broilers, and turkeys during 1971. Because of the confidential nature of the data, cash receipts from turkey eggs and other poultry are included as other livestock. Included with sheep cash receipts are returns from wool sales as well as income from sale of sheep and lambs.

Cash receipts from the sale of greenhouse vegetables are included with vegetable cash receipts, and not with greenhouse and nursery. The county vegetable estimates are a combination of field grown vegetables and vegetables grown under glass. For purposes of ranking, potatoes were considered as separate from vegetable cash receipts. Cash receipts from fruit crops are made up of returns from small fruits as well as from tree fruits and nuts.

Two important factors influencing any comparison by counties are the size of the counties and the major source of cash receipts in each county. Table VI presents the average cash receipts per farm and per acre by county. These averages aid in the comparison of counties with similar farming practices better than a comparison of the total cash receipts. The 1964 and 1969 Census defined a farm as any tract operated as a unit of 10 or more acres, if the **estimated** sales of agricultural products for the year amounted, or normally would amount, to at least \$50; or if less than 10 acres, had sales of agricultural products totaling \$250 or more.

County estimates of cash receipts do not include the value of commodities used on farms. For example, producers may market grain and hay in the form of beef or milk rather than in its original form. By counties, the relative importance of some commodities would be different if the value of these commodities used on farms where produced were computed. Figured on a season average price basis for each commodity, the value of selected crops used on farms where produced in 1971 would amount to \$141 million for corn, \$64 million for hay and \$12 million for oats.

This bulletin has been prepared through the efforts of many people. Included are personnel of the Ohio Agricultural Stabilization and Conservation Service, Federal Milk Market Orders operating in Ohio, the Ohio Department of Agriculture, the Ohio Agricultural Research and Development Center and the Agricultural Research Service. Special recognition is due the professional and clerical work done by the staff of the Ohio office of the Statistical Reporting Service, particularly Mr. Gary Bovard. However, the greatest recognition is due to the large number of Ohio farmers and agri-businessmen for their interest and help in providing the basic data used in compiling the information for this bulletin.

TABLE I

CASH RECEIPTS FROM FARM MARKETINGS AND GOVERNMENT PAYMENTS, OHIO, 1930-1971

Year	Farm Marketings			Govern- ment Payments	Total Cash Receipts and Government Payments	Percent of All Commodities
